VIV·A·CIOUS
Hair & Beauty

OWNER'S GUIDE · OCTOBER 2026

Your salon website. How it works, and how to run it.

Everything clients see, and everything you control, in one place. No developer needed for day-to-day changes.

Prepared for Viv-a-cious Hair & Beauty · 34 Beachway Place, Durban North
Screens in this guide are from your live site.

START HERE

The two sides of the site

Clients use the website on their phones. You and your team use the admin panel on a laptop. Both are the same web address, no app to install.

CLIENT WEBSITE	vivacious-taupe.vercel.app (your own domain name will replace this)
ADMIN PANEL	Same address, then **/dashboard**. Sign in with your owner email and password at **/login**; you land on the admin automatically.
WHO SEES WHAT	Clients see the menu, team, gallery, reviews, their own bookings and points. Staff see the admin panel. Only the owner sees mystery-shopper entries.
PAYMENTS	None online. Clients pay in the salon as usual. The site only takes bookings and runs points.

What's in this guide

01	What your clients see	3
02	Your day: Overview and Bookings	4
03	Guests and points	5
04	Your treatment menu	6
05	Your team: photos, hours and specialities	7
06	Gallery and reviews	8
07	Loyalty, vouchers at the till, and emails	9
08	Mystery shopper	10
09	Website settings: words, photo, hours	11
10	Questions you'll have	12

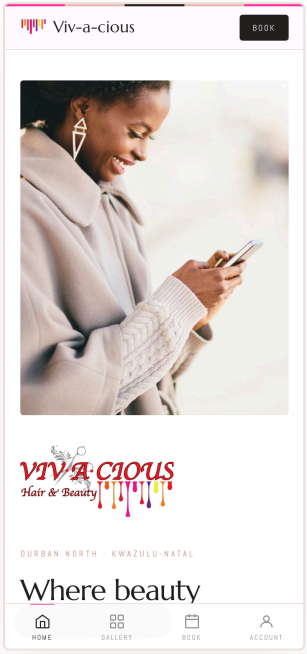

A GOOD FIRST WEEK

1 · Change your password after first sign-in. 2 · Replace the placeholder treatment menu with yours. 3 · Add your therapists with photos and hours. 4 · Delete the sample gallery items and reviews, add real ones. 5 · Fill in the Website section of Settings. 6 · Make a test booking from your phone and complete it in the admin.

01

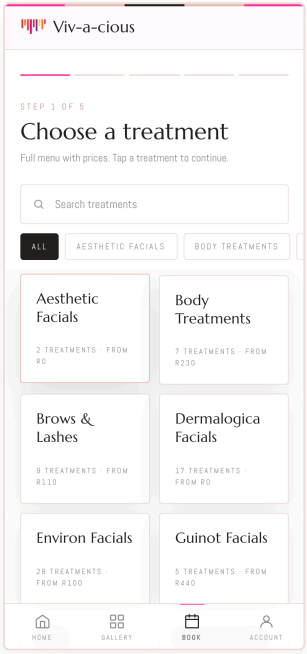

What your clients see

Home, menu, team, gallery, reviews and your details on one page. Booking takes under a minute: category, treatment, therapist, time, confirm.

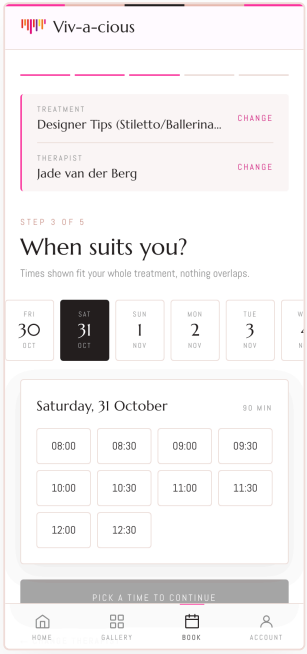

Home

Your words and photo, from Settings

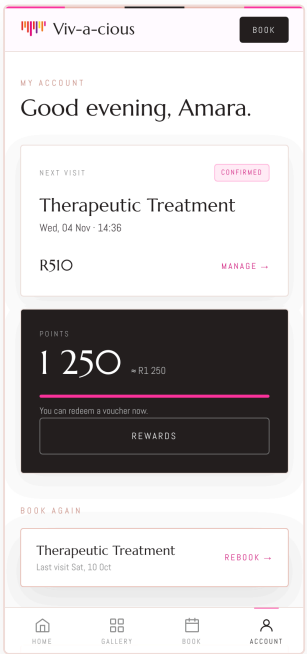

Book

Categories, then treatments with prices

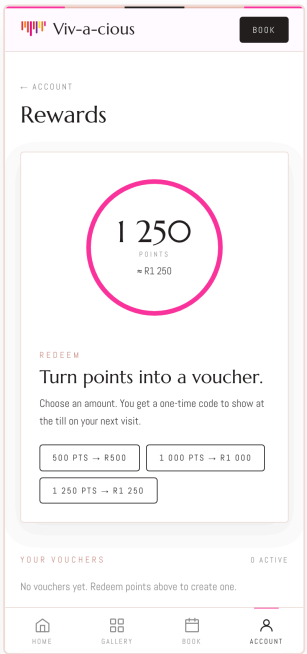

Pick a time

Only slots that fit the therapist's hours

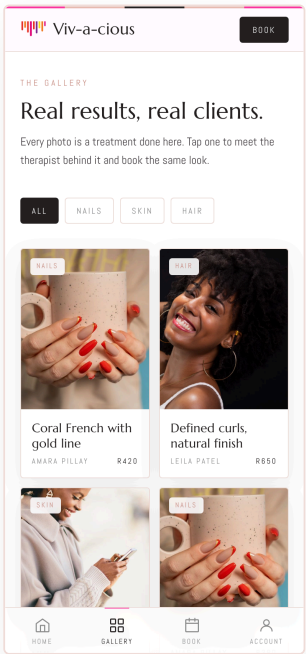

My account

Next visit, points, one-tap rebook

Rewards

Points become a voucher code

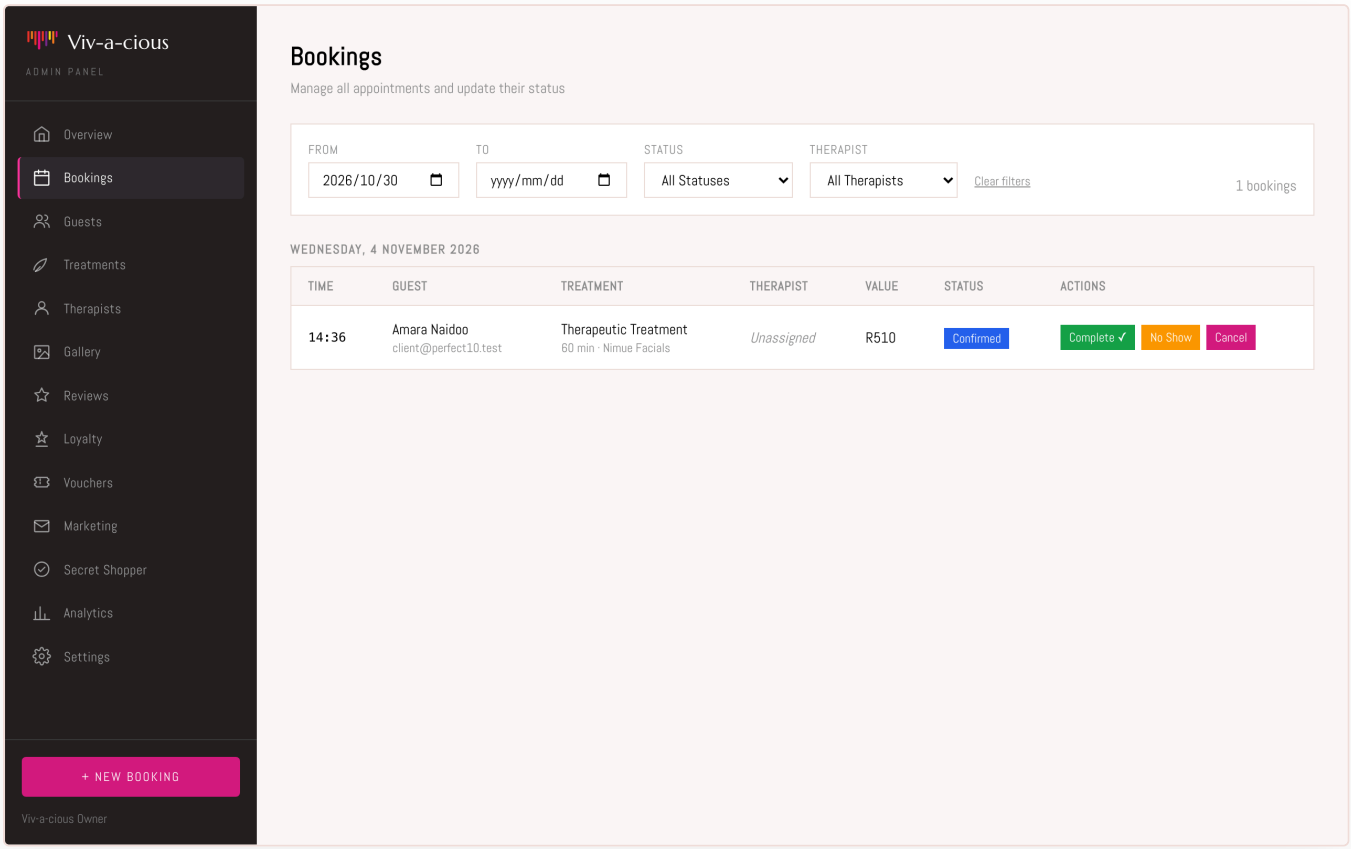

Gallery

Only what you publish

02

Your day: Overview and Bookings

Overview shows today at a glance. Bookings is where you confirm, complete, or cancel.

When a client books

01 The booking appears under **Bookings** as **Awaiting confirmation**.

02 Tap **Confirm** once you've checked the diary. The client sees "Confirmed" in their account.

03 After the visit, tap **Complete ✓**. Points are credited to the client automatically, once.

04 Didn't show? Tap **No show**. Need to cancel? **Cancel**. No points are issued either way.

Good to know

01 Filter by date, status or therapist at the top. **Clear filters** shows everything.

02 **Unassigned** means the client chose "Any therapist". Anyone free can take it.

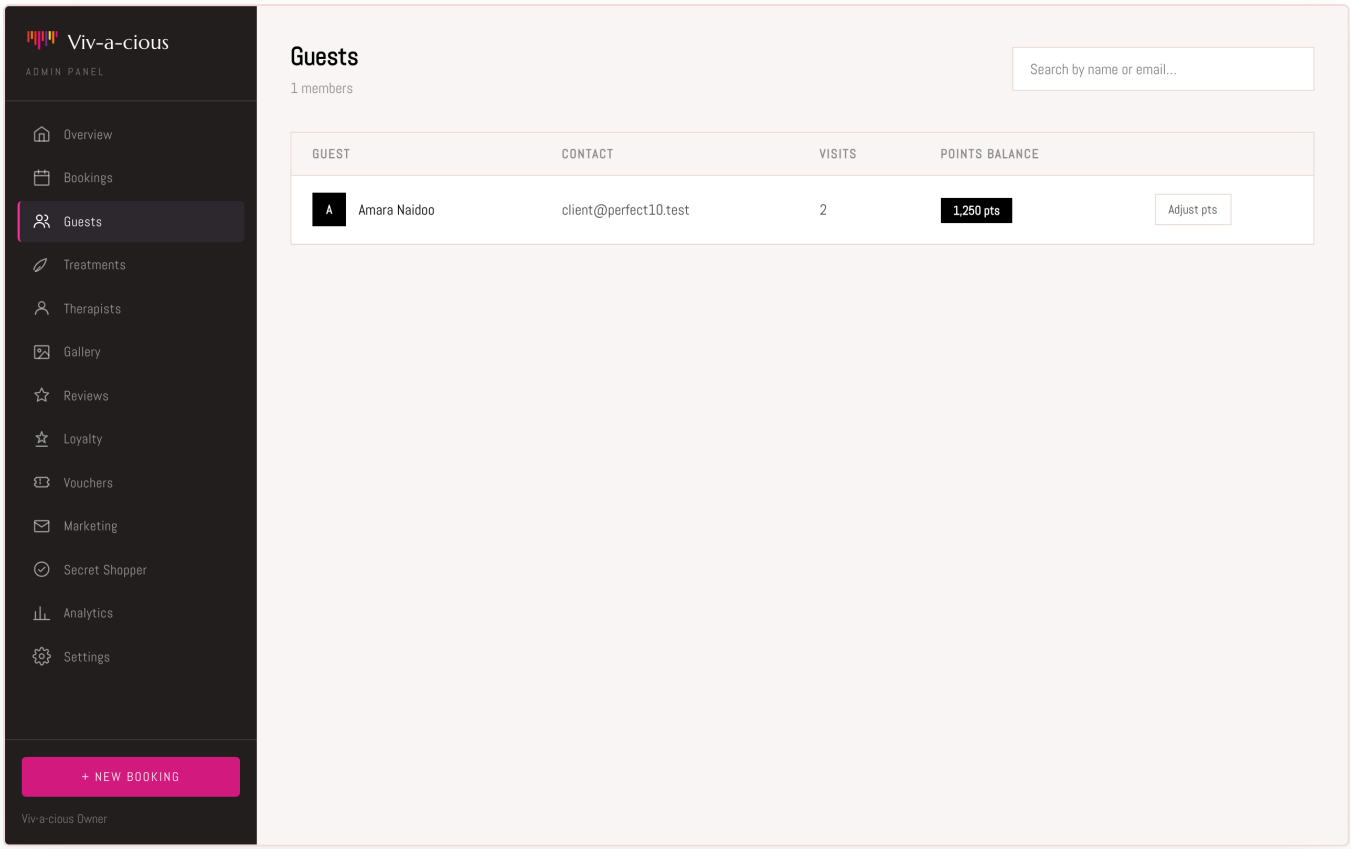

03 Clients can cancel their own upcoming bookings from their account.

04 Points are only ever credited from **Complete ✓**, so completing is the one habit that matters.

03

Guests and points

Every member who signs up appears under Guests with their visits and balance.

Adjusting points

01 Find the guest with the search box (name or email).

02 Tap **Manage points**, choose add or remove, enter the amount and a short reason.

03 The change shows in the client's points history with your reason, so it is always explainable.

How points are earned

01 Automatically when a booking is marked **Complete** ✓, at the rate you set under Loyalty.

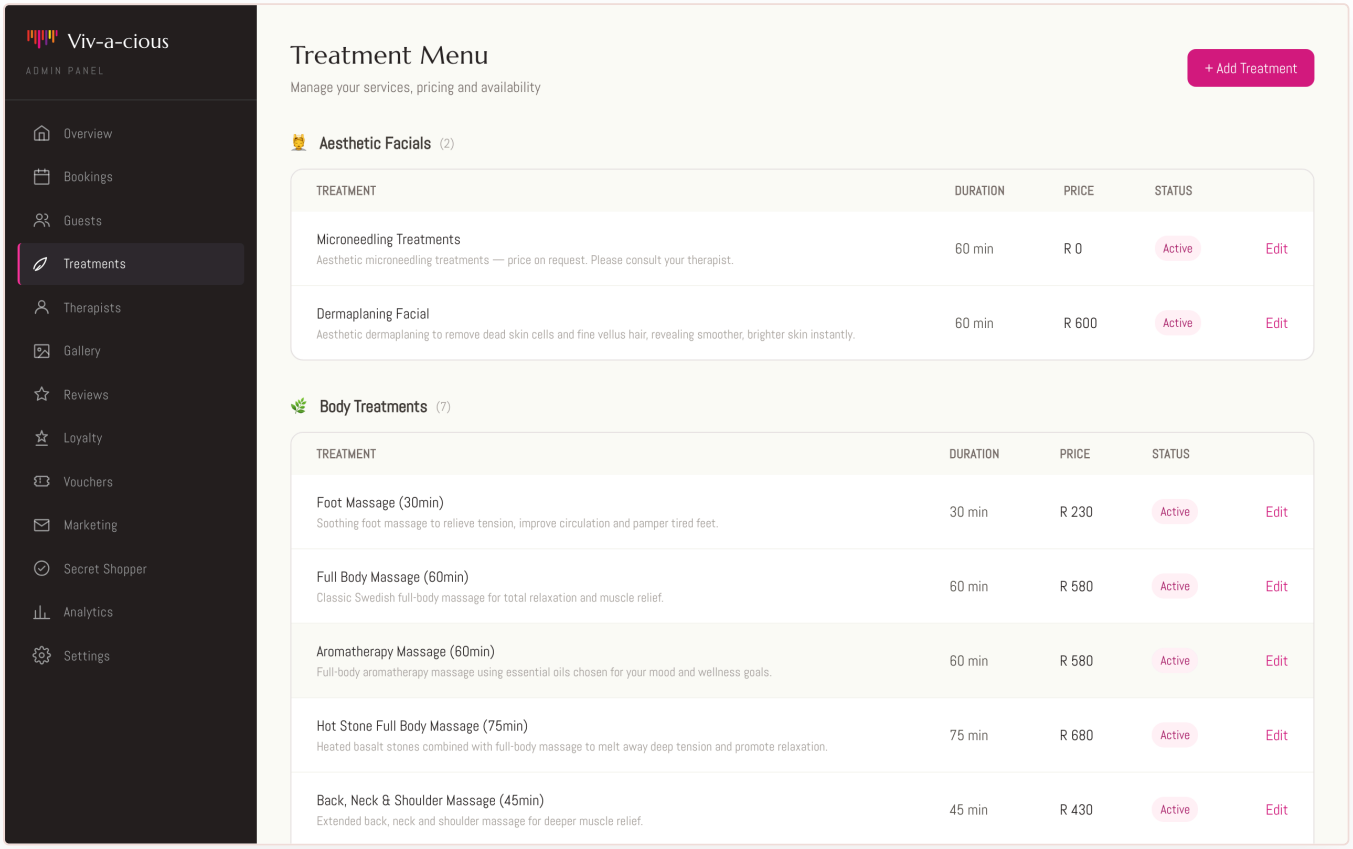

02 A birthday bonus in the client's birthday month, if their birthday is on file.

03 A rebooking bonus when they return within the window you choose.

04

Your treatment menu

Treatments is the public menu. Whatever is here, with these prices, is what clients can book. The current list is a placeholder, so this is the first thing to replace.

Adding a treatment

01 Tap New treatment.

02 Give it a name, a category (for example *Hair*, *Nails*, *Facials*), the duration in minutes, the price and a one-line description.

03 Save. It appears on the website immediately under its category.

Tips

01 Categories are free text. Spell them consistently so they group together.

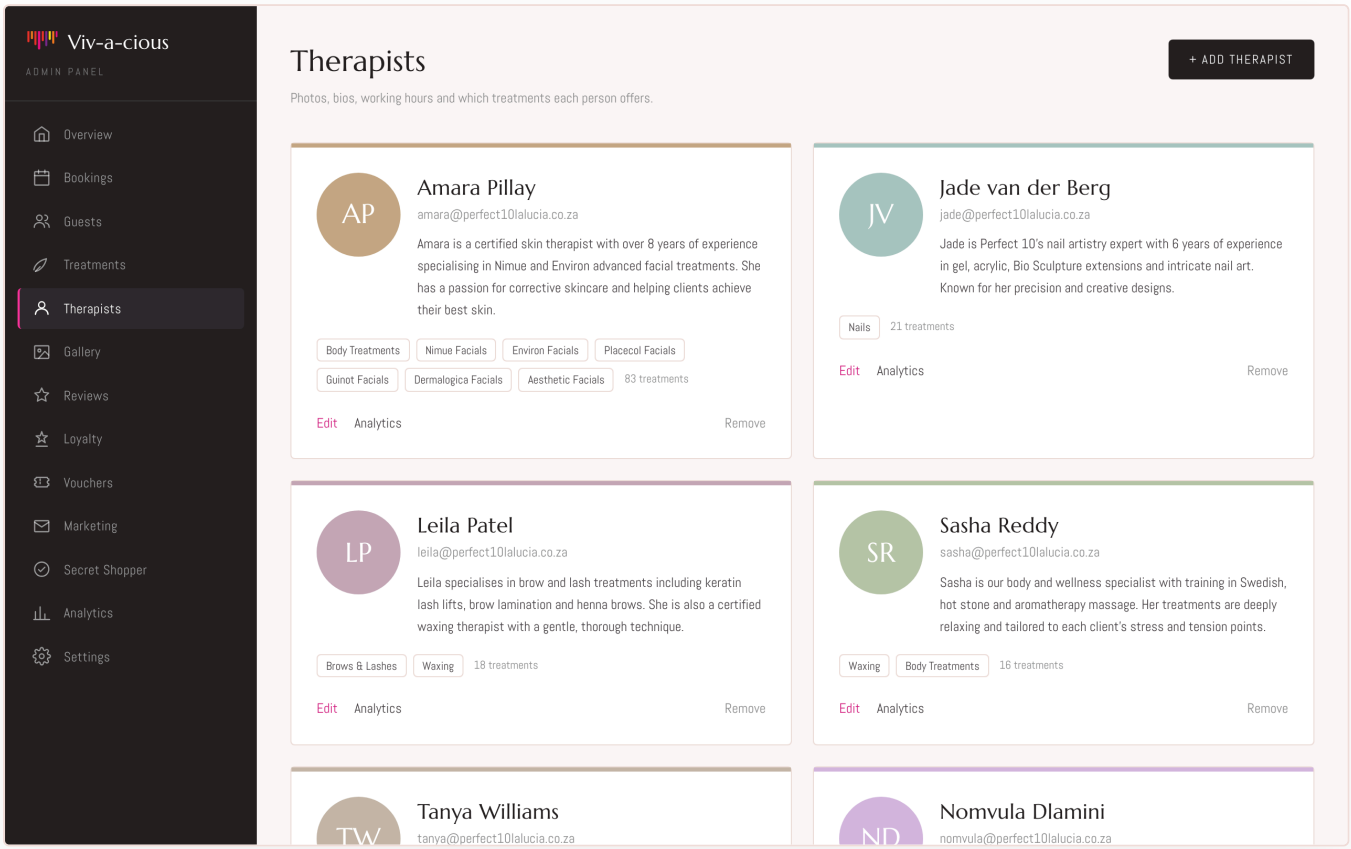

02 Duration drives the time slots clients are offered, so keep it realistic.

03 Turn a treatment off instead of deleting it if you might bring it back.

05

Your team

Clients choose their person while booking, so each therapist's photo, hours and treatments matter.

Adding a therapist

01 Tap + Add therapist. Enter name and email, a short bio, and upload a photo.

02 Set working hours per day. Untick a day to mark it closed. Clients only see times inside these hours.

03 Tick the treatments this therapist offers. Tick a category heading to select the whole category.

04 Save. They appear on the home page and in the booking flow straight away.

Why the ticks matter

01 A client booking a facial only sees therapists with facials ticked.

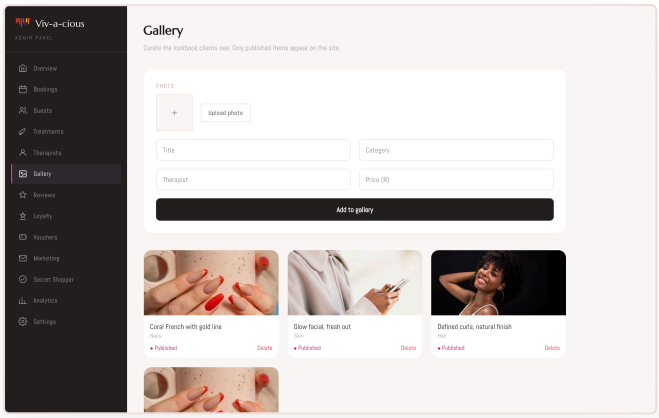

02 If nobody has a treatment ticked, clients can still book it with "Any therapist", and it lands as Unassigned for you to place.

03 Someone leaving? Remove keeps their past bookings but takes them off the site.

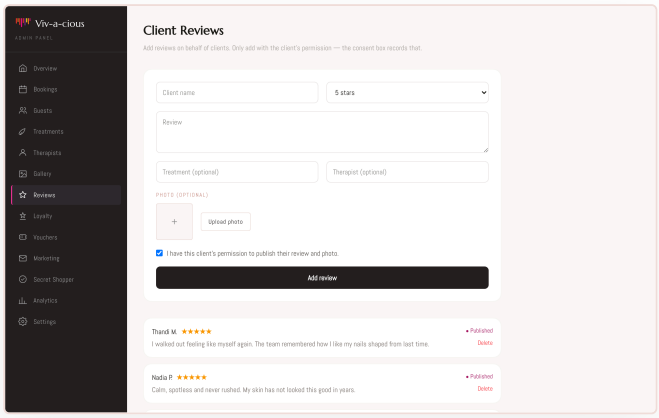

06

Gallery and reviews

Both are yours to curate. Only what you add is shown; clients cannot upload anything.

Gallery

Reviews

Adding a look to the gallery

01 Tap **Upload photo** and pick a picture from your phone or computer. It is resized automatically.

02 Add a title, the category, the therapist's name and the price, then **Add to gallery**.

03 Delete anything that has dated. Fresh beats full.

Adding a review

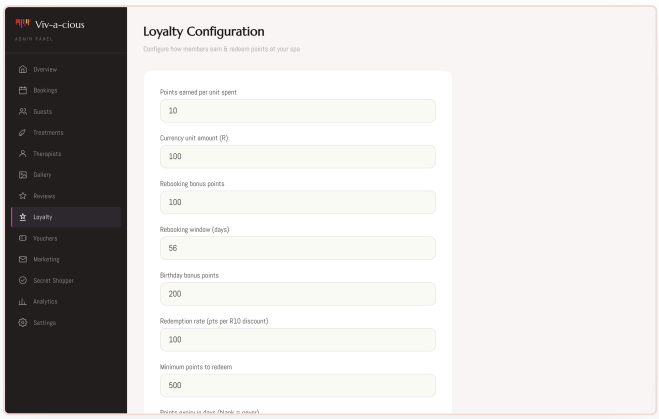

01 Only add a review the client has agreed to share. Tick the permission box as your record.

02 Enter their first name and initial, a star rating, the words, and the treatment.

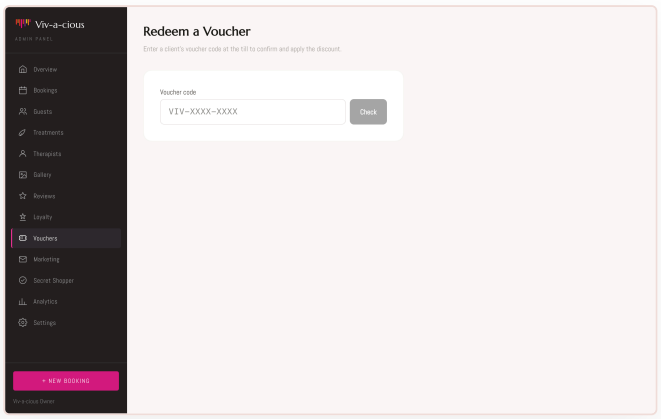

03 The three most recent appear on the home page.

07

Loyalty, vouchers and emails

Loyalty

Vouchers

Setting the numbers

01 Under **Loyalty**, set points per Rand spent, the minimum points to redeem, and what a point is worth.

02 Set the birthday and rebooking bonuses, and how long a voucher stays valid.

03 Changes apply to future visits. Existing balances are untouched.

Redeeming at the till

01 The client taps a voucher amount in their account and shows you a code like VIV-7KF9-QM3X.

02 Under **Vouchers**, type the code and tap redeem. The screen confirms the value and marks it used.

03 Take the value off the bill. A code can never be used twice.

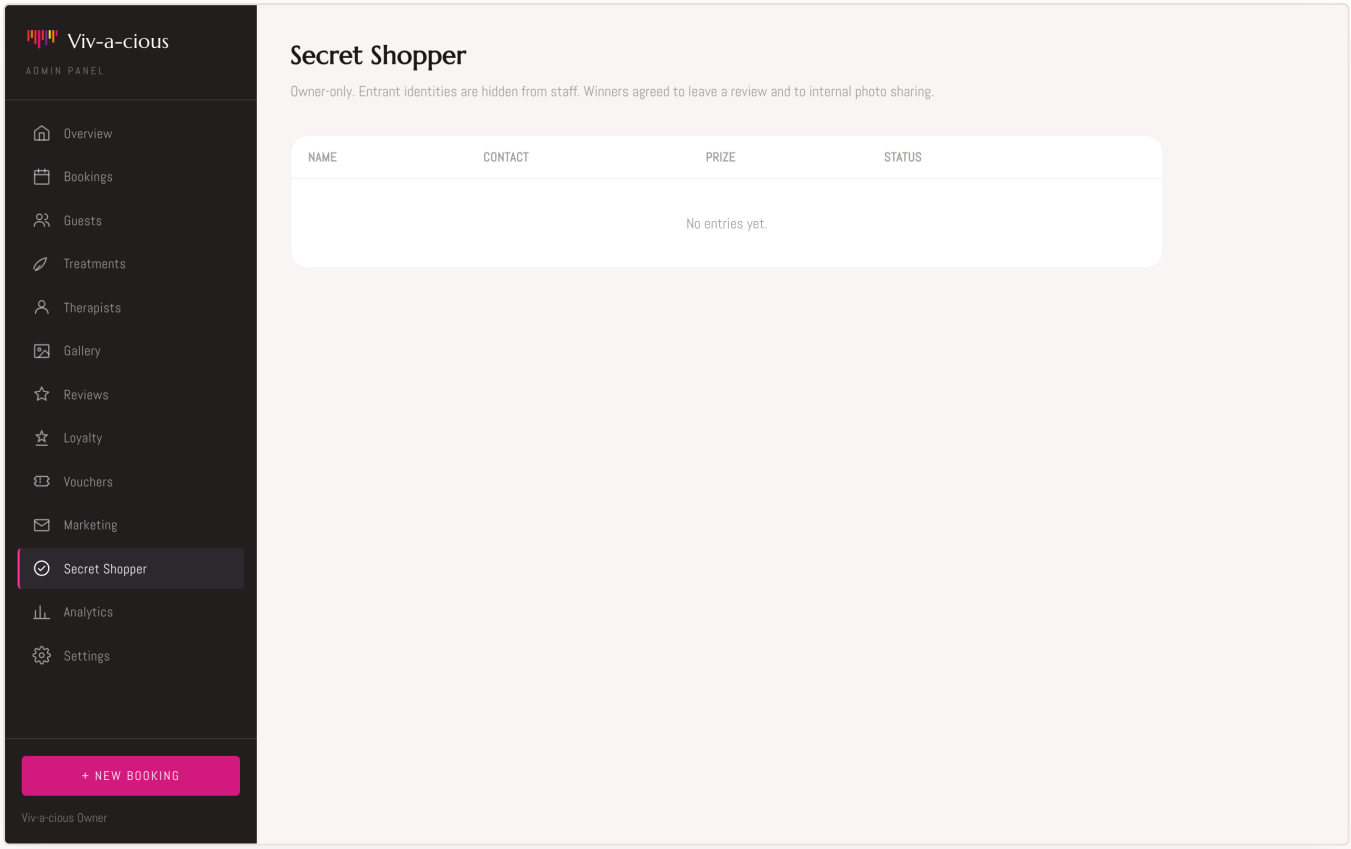

EMAILS

Under **Marketing**, write a subject and message and send it to every client who ticked "email me offers" when they joined. Separately, clients who haven't visited in a while receive an automatic "we've missed you" email once a week, with no action from you.

08

Mystery shopper

Clients enter from the website with an email code, one entry per person. Only your owner login sees who entered. Your team never does.

The journey

01 A client enters at Mystery Shopper → Enter the programme, verifies their email and agrees to leave an honest review.

02 The site draws a result using the rewards and odds you set under Settings → Mystery shopper rewards.

03 A chosen shopper books like any client, then registers the visit and submits a scored review on the site.

04 You read the review under Secret Shopper and reimburse the treatment as agreed.

Rules built in

01 One entry per email address. Repeat attempts and code guessing are blocked.

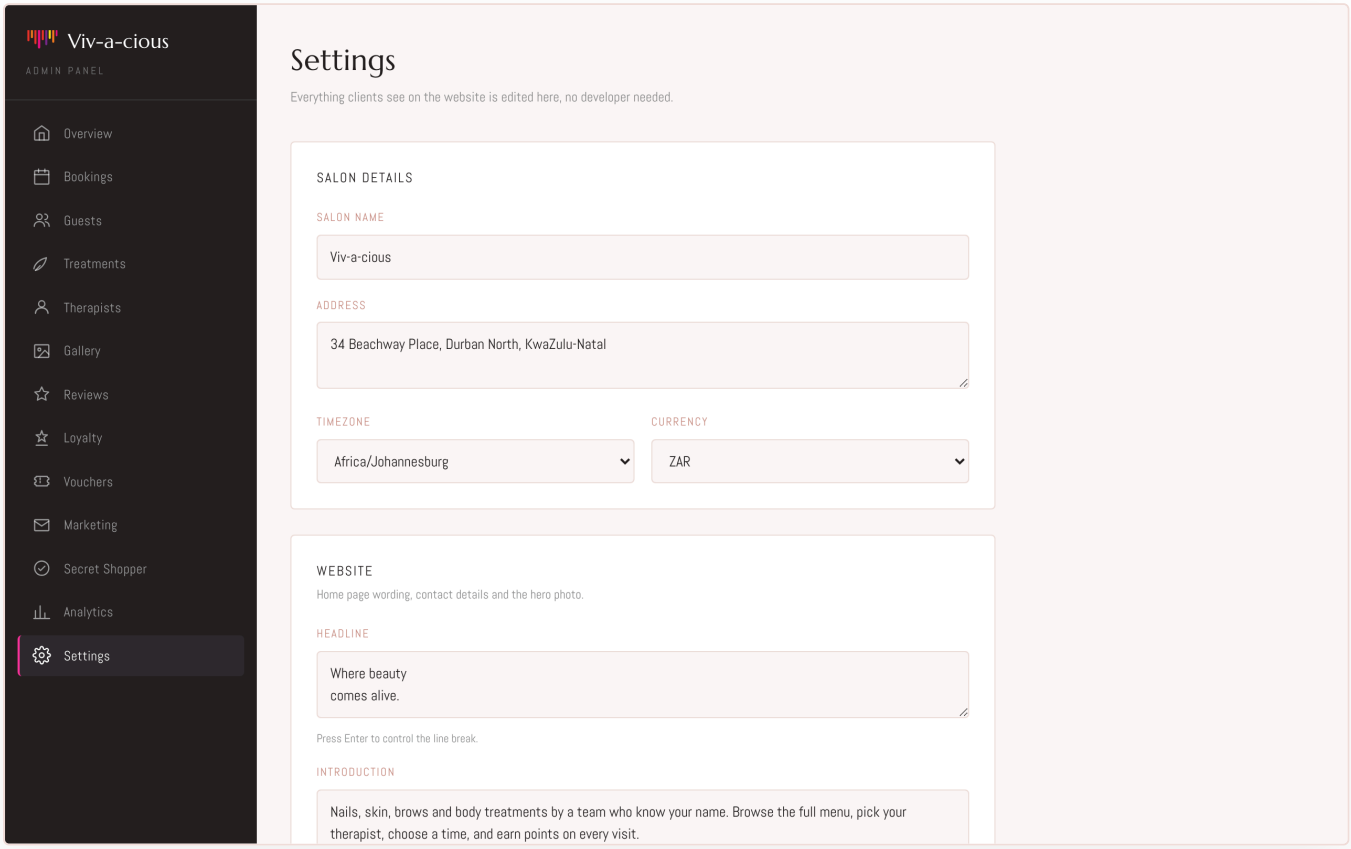

02 Once chosen, a person can't be drawn again for a cooling-off period.

03 The result is decided on the server, so nobody can rig it from their phone.

09

Website settings

The words and photo on your home page, your phone number, opening hours and Instagram handle all live here. Save, and the site updates straight away.

What each field changes

01 Salon name and address: the header, footer and the "Find us" section with its Maps link.

02 Headline and introduction: the first words on the home page. Press Enter in the headline to control the line break.

03 Phone, hours, Instagram: shown in the footer and the "Find us" section.

04 Hero photo: the large photo beside your headline. Portrait photos work best.

Mystery shopper rewards

01 Add a reward line, for example "50% off your next treatment".

02 Set its weight. Weight 3 is three times as likely as weight 1.

03 Untick Win for a "not this time" outcome so not every entrant is chosen.

10

Questions you'll have

Can my team use the admin?

Yes. Each therapist you add has a staff login with the same admin panel, except the Secret Shopper page, which is owner-only.

A client says they can't see a time they want.

Check the therapist's working hours and that the treatment is ticked for them. Slots also have to fit the whole treatment duration before closing time.

Can I change prices for a season?

Yes, edit the treatment under Treatments. Bookings already made keep the price they were booked at.

How do clients know about points?

The home page invites them to join free, and every booking confirmation tells them roughly how many points it will earn. Their account shows progress to the next voucher.

What if someone enters the mystery shopper twice?

They can't. The second attempt with the same email is refused, and codes expire quickly.

Something looks wrong on the site.

Almost everything is content you can fix in the admin. If a page is broken rather than wrong, that is a developer's job. Send a screenshot and what you were doing.

KEEP HANDY

Admin: your site address + **/dashboard** · Voucher codes start with **VIV-** · Points only credit on **Complete** ✓ · Settings changes are live immediately.

Where beauty comes alive. Now online.
